Gold Shovel Standard Certified Training Providers

Gas Monitor sales and service: We are a proud distributor of RKI Instruments. We can supply portable individual and multi-gas units, fixed systems, and a variety of custom solutions.

NCCER Crane Operator, Rigger, and Signal Person Certifications

Safety Manual: We can provide you with a custom-tailored and compliant manual to fit your needs.

On-line Accounts: We are equipped to handle all of your on-line account management needs. We work with ISNetworld, PICS, PEC Premier, BROWZ, etc. We can setup and maintain your accounts.

Safety Meetings/Training: We will coordinate your safety meetings to ensure compliance with your OSHA-mandated annual training, and the content of your manual. We will maintain a safety training matrix to track your annual training by topic and employee. Safety meetings can be set up with whatever frequency works for your operations—weekly, monthly, quarterly, or annually. We can provide training wherever and whenever it is most convenient for your employees. We will utilize fresh material and state-of-the-art equipment to conduct your training (i.e. BullEx Bullseye, multimedia presentations, quantitative fit testing, etc.).

Crane Operator Certification

On-site safety personnel

Aerial Lift

DOT Operator Qualifications (OQ)

Are you affected by the OQ Rule? The requirements of the DOT OQ Rule have placed a significant burden on pipeline operators and contractors. Our goal is to find the easiest, most cost-effective methods of compliance for all of our clients.

DOT Pipeline OQ Provider: We know you work for more than one operator, and they each have their own requirements for Qualification. We can help. We have certified evaluators for all OQ providers, such as NCCER, Veriforce, OQSG, ENERGY worldnet, MEA, and eWebOQ, etc.

On-site or In-house Instructors, Evaluators, and Proctors available

We will travel to you, anywhere, 7 days a week. We pride ourselves on Quality, Reliability, and Availability.

Rope Access/ Standby Rescue Personnel/Medical Services

Southland Safety provides an economical and efficient alternative to scaffolding. Our **rope access** Technicians are equipped to provide access and egress services for all sorts of applications—confined space entry, building/bridge work, offshore platform work, etc. Rope Access saves the time and expense of scaffolding, and it is safer and easier than conventional rope ladders.

Southland Safety also provides standby **high-angle and confined space rescue** technicians and **medical services** teams to oil and gas operators and contractors. Southland's Rescue Personnel have worked in gas plants, on pipelines, in lumber mills, and other facilities in Texas, Louisiana, Oklahoma, Arkansas, New Mexico, Tennessee, and Mississippi. All of our response trailers are specially equipped for **technical rescue** support and **on-site medical services**.
